

SHARING ENERGY RAVEN WITH HOMEBUYERS

_____ has always been committed to giving homebuyers critical insights into their biggest investment. Including Energy Raven with our inspections delivers on that promise.

Energy Raven is a new AI-powered energy analysis **offered exclusively** through top-ranked home inspection companies. _____ is proud to announce that we are now part of the Energy Raven network!

WHAT IS IT?

Energy Raven uses information from a home inspection along with unique public and private data sources and Department of Energy analytics to create a roadmap for homeowners to:

- Upgrade outdated systems
- Evaluate solar and EV potential
- Reduce energy bills
- Improve comfort and indoor air quality
- Positively impact the environment
- **Take advantage of the free money available to accomplish all of the above!**

WHY NOW?

- The Inflation Reduction Act has allocated **\$9 Billion to homeowners** for energy efficiency projects - but they are time sensitive and will run out quickly!
- **Energy prices have risen 13%** in 2022 alone and are predicted to increase even more in coming years
- More and more states and cities are promoting electrification - **homeowners and buyers are increasingly interested in learning about solar and EV** as a result

HOW DOES IT WORK?

Following your home inspection you will receive a link from Energy Raven to your home-specific dashboard results. Inside you'll see

- Estimated costs to run the home
- Breakdowns by system and appliance
- An analysis of which items would benefit from an upgrade
- Evaluations of the potential for solar energy and EV charging
- Federal, state, local, and utility tax credits and rebates that apply to your home
- Help getting projects done!

Your Raven dashboard and their support services are available to you for as long as you own your home!
